

National Ethanol Vehicle Coalition

It's significant as a distillate.

When it is ethanol
a bushel of corn produces

2.7 gallons of ethanol

11.4 pounds of gluten feed

3 pounds of corn meal

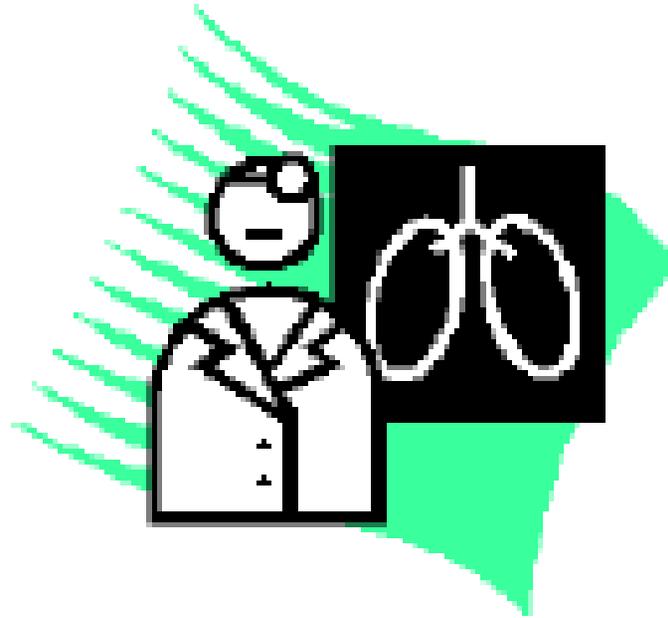

1.6 pounds of corn oil

When 10 Gets You 25

10% ethanol in gasoline
reduces harmful automobile emissions
up to 25%

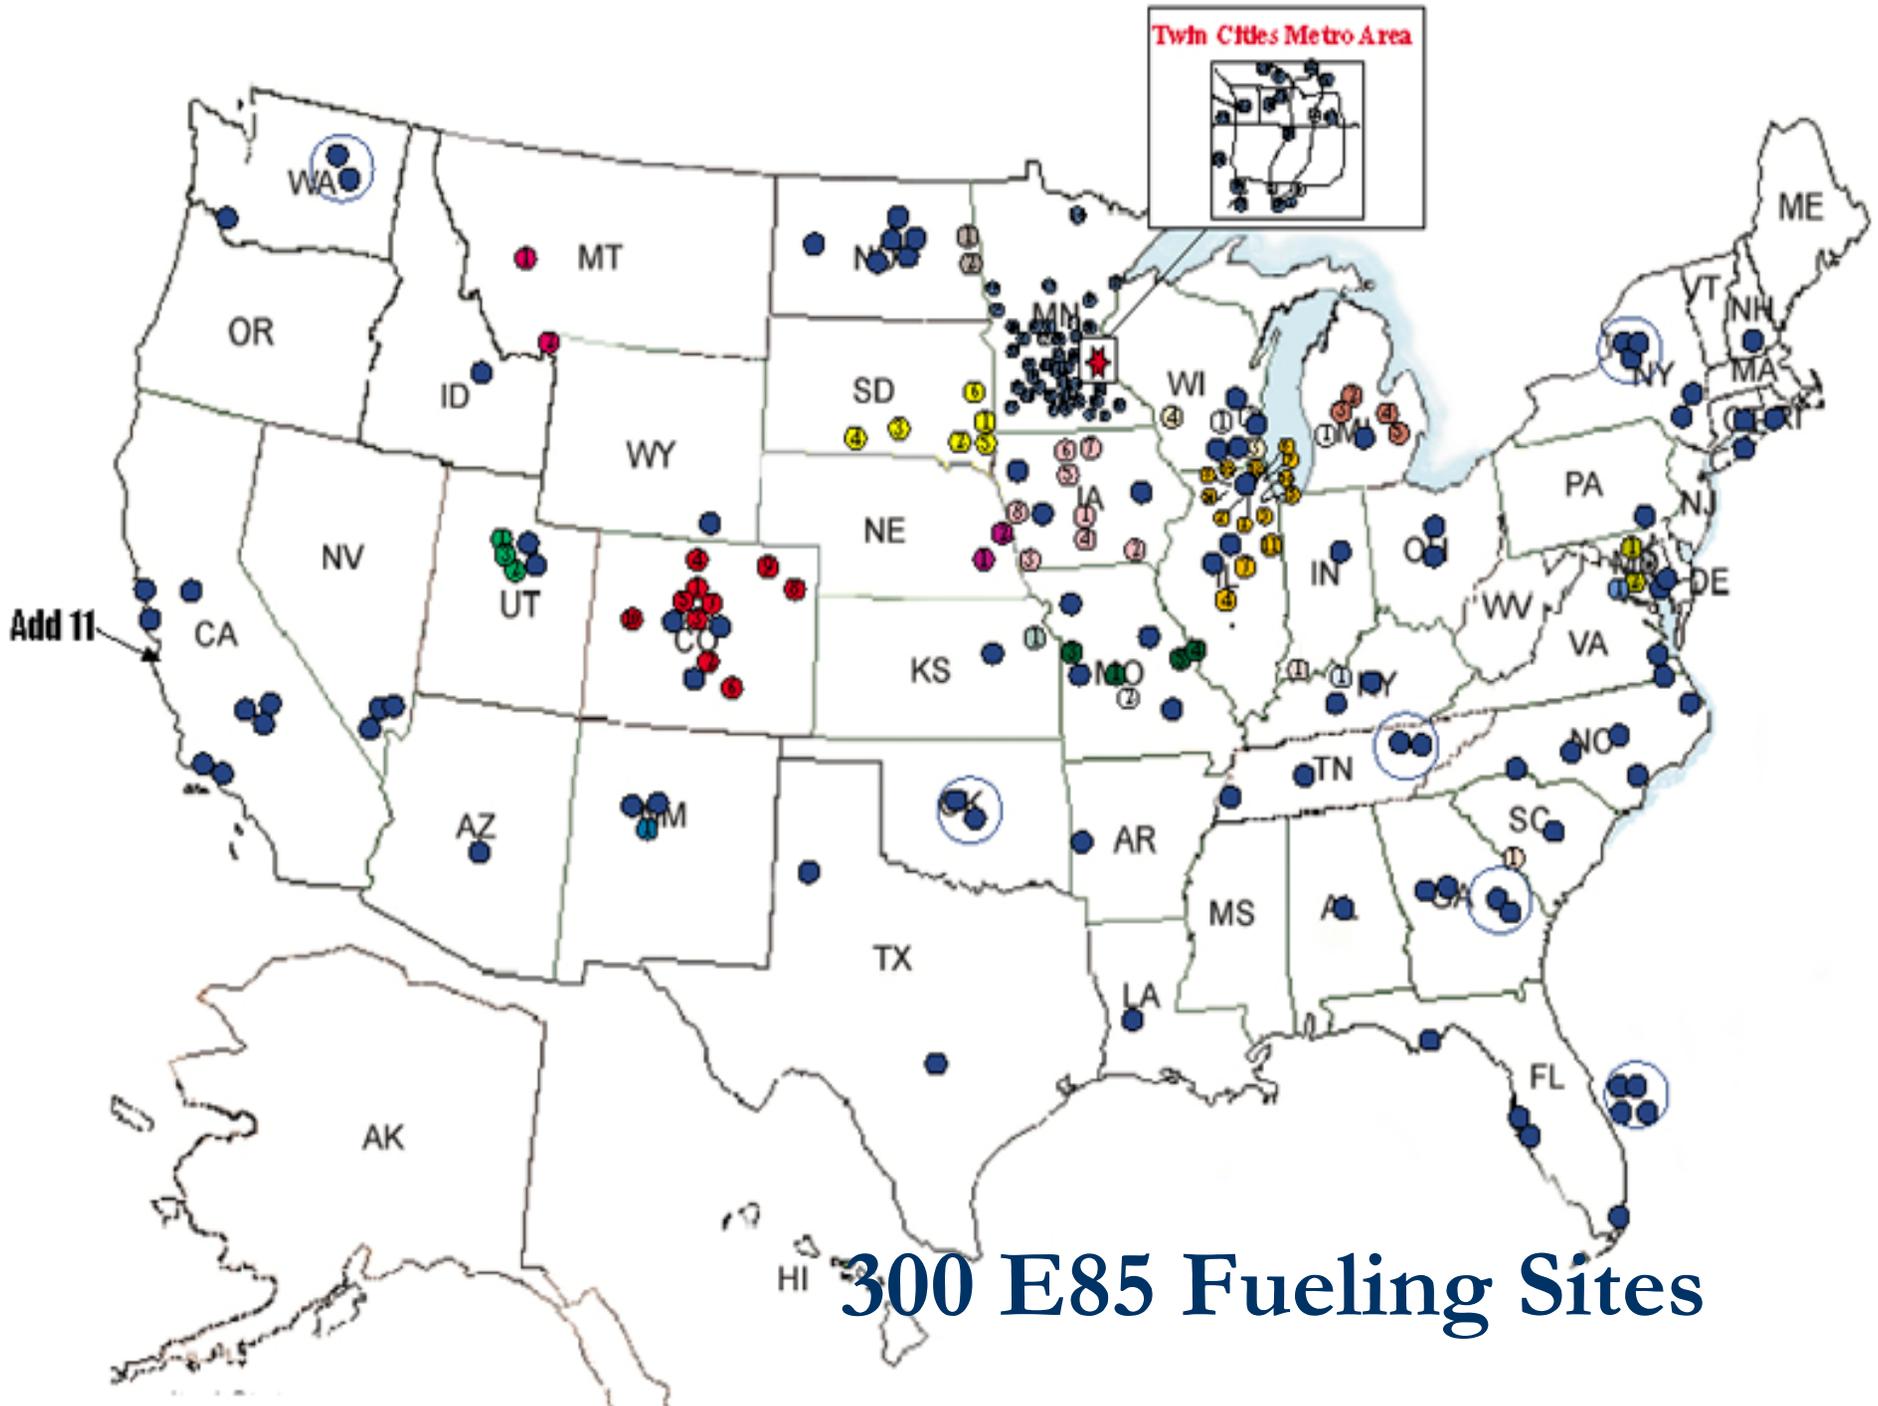

Cleaner Air With Ethanol

9 out of 10 doctors recommend clean air
to patients who have lungs

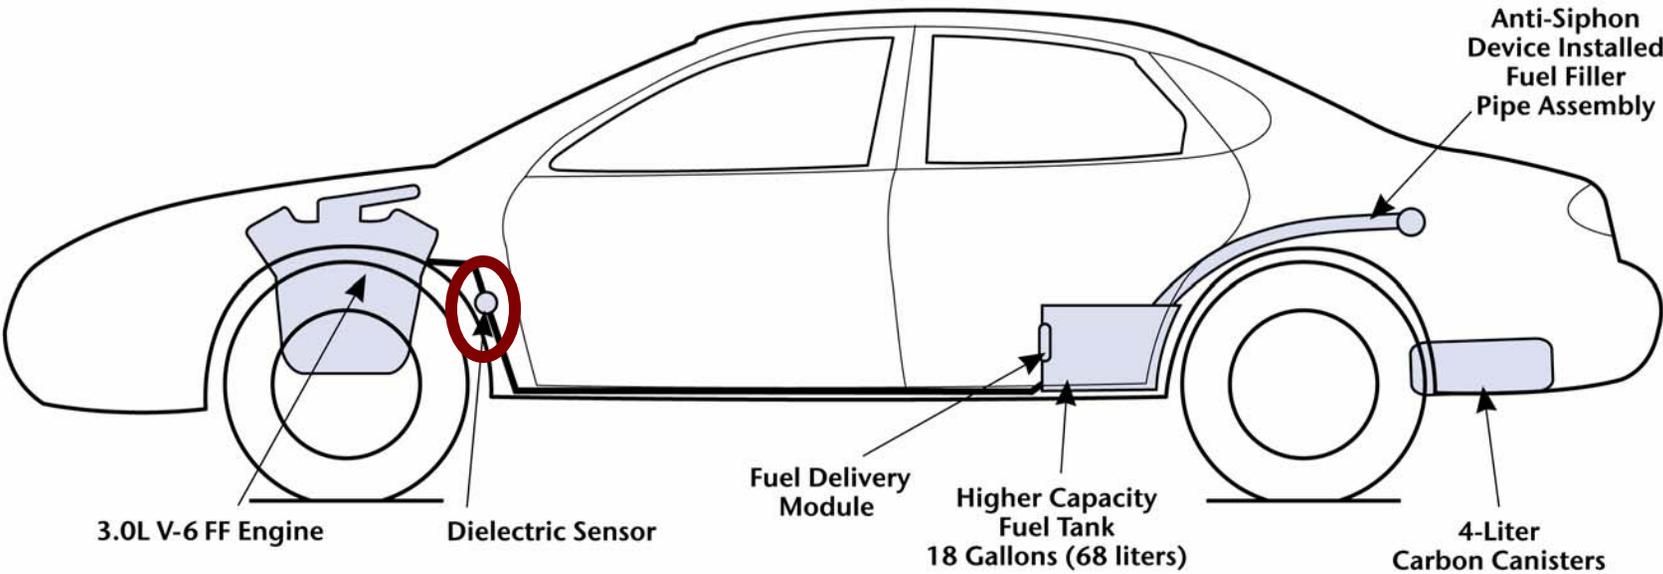

25% of 2004 domestic fleet is flex-fuel

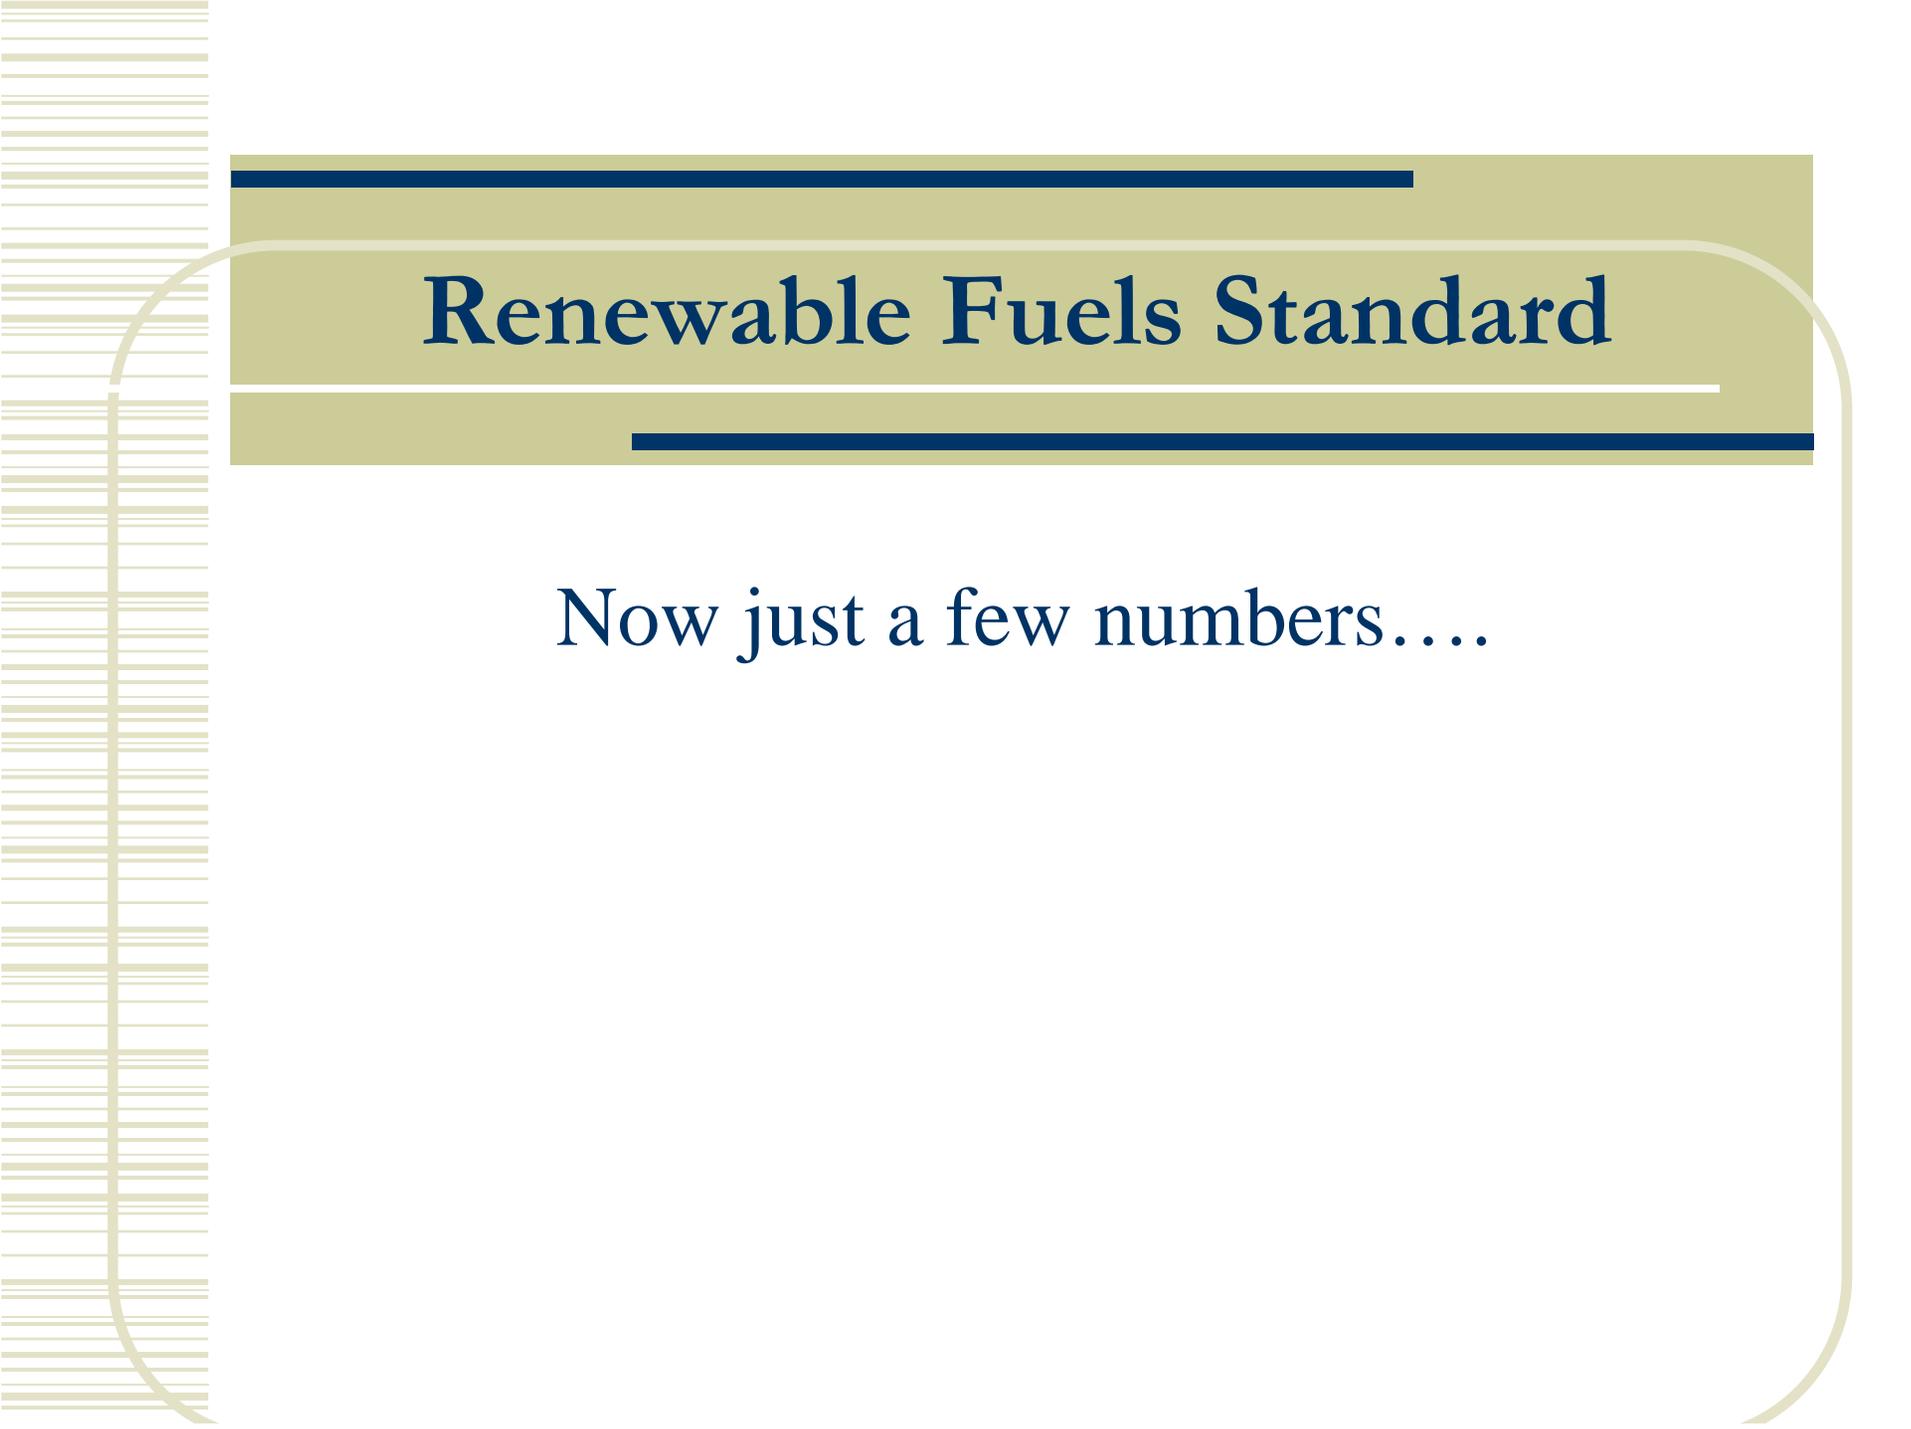

300 E85 Fueling Sites

The Flex Fuel System

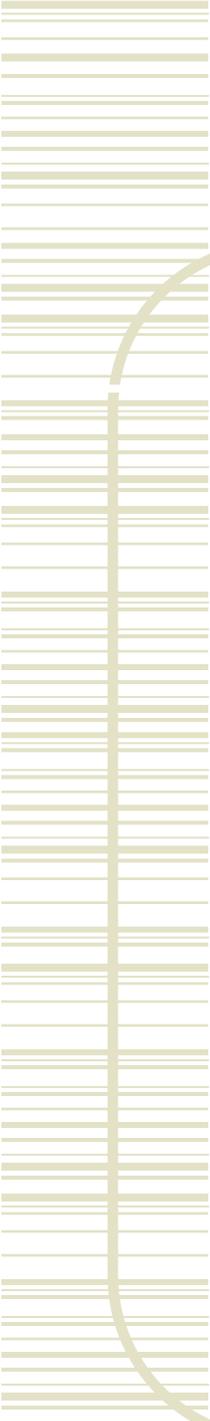

“America cannot have homeland security without energy independence.”

This car doesn't need gas

Flexible-Fuel vehicles are designed to run on regular gasoline, E85 or any combination of the two.

E85, a blend of 85% ethanol and 15% regular gasoline, is available at a number of filling stations in Colorado.

When driving this vehicle with E85, you help the environment by dramatically reducing emissions. The higher octane (107) in E85 will also improve your vehicle performance.

In addition to helping the environment by using E85, you are eligible for **FIVE FREE TANKS** of E85 from area stations (see map of fueling sites in glove box).

Mad
in the
U.S.A!

Congratulations on your purchase of a flex-fuel vehicle.

To thank you for helping keep Colorado's air clean through the use of E85, we'd like to give you five free tanks of E85 from any of the stations listed on the back of this card.

We hope you will see improved performance and cleaner emissions so you will use E85 whenever possible.
