

## National Ethanol Vehicle Coalition

## It's fit for a daddy corn distributor.

When it is ethanol  
a bushel of corn produces

- 2.7 gallons of ethanol
- 11.4 pounds of gluten feed
- 3 pounds of corn meal
- 1.6 pounds of corn oil

## When 10 Gets You 25

10% ethanol in gasoline  
reduces harmful automobile emissions  
up to 25%

## Cleaner Air With Ethanol

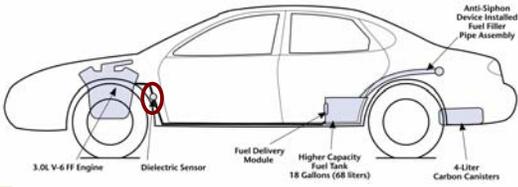

9 out of 10 doctors recommend clean air  
to patients who have lungs

25% of 2004 domestic fleet is flex-fuel

## The Flex Fuel System

“America cannot have homeland security without energy independence.”

## Renewable Fuels Standard

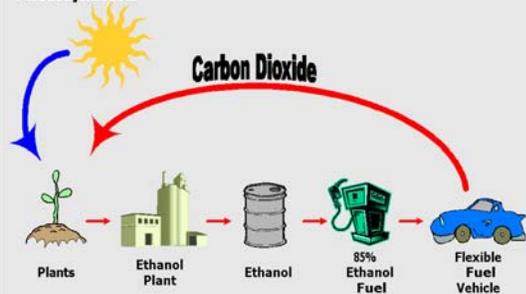

Now just a few numbers....

National Ethanol Vehicle Coalition

**This car doesn't need gas**  
 Flexible Fuel vehicles are designed to run on regular gasoline, E85, or a combination of the two.  
 E85, a blend of 85% ethanol and 15% regular gasoline, is available at a number of filling stations in Colorado.

When driving this vehicle with E85, you help the environment by decreasing harmful tailpipe emissions. The higher ethanol (E85) will also improve your vehicle's performance.

In addition to helping the environment by using E85, you are eligible for **FIVE FREE TANKS** of E85 from our partner network of leading ethanol blenders.

**This vehicle fueled by E85 Thank You Mad in the U.S.A!**
